-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 September 2006.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3723

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Koetje.

Koetje in Figure 1 shows a pad having a central aperture 32. The portion surrounding the aperture may be termed a hub. The pad includes lobes 34. Between the lobes are arcuate recesses 36. The recesses 36 subtend an angle no greater than 180 degrees and the center point for the recess is located outside of a circle circumscribed through the distal ends of the lobes 34. The type of elongate member that is inserted in the central aperture is a matter of intended use that has no patentable significance. In any case the Koetje pad is capable of receiving a pipe or a bar of a bar clamp in the central apertures since pipes and bars of bar clamps are available in a wide range of sizes and one could be found to match the size of the aperture in the Koetje pad.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-6 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koetje in view of Suhr.

Art Unit: 3723

Suhr teaches that the pad may be molded with a rib 20.

To employ a molded construction for the Koetje pad which will include a rib or ribs wherever desired would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Suhr. One of ordinary skill in the art would have been motivated to do this in order to manufacture the device cheaply and to provide strength and reinforcement which is afforded by rib construction. Koetje's pad comprises four lobes. Four lobes also "comprises" three lobes.

Claims 9-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/15/06 and 4/20/06.

Applicant's remarks have been given careful consideration. The newly claimed features pertaining to geometry of the arc of the recess are identical to the geometry of the recesses 36 in the newly applied Koetje device.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3723

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
